

## Block-level Elements

Block-level elements typically start on a new line and take up the full width available. They can contain other block-level elements or inline elements. Common block-level elements include the following:

- `<address>`: Contact information.
- `<article>`: An independent piece of content.
- `<aside>`: Sidebar content related to the surrounding content.
- `<blockquote>`: A section quoted from another source.
- `<canvas>`: A container for graphics drawn with JavaScript.
- `<dd>`: A description list definition.
- `<div>`: A generic container for flow content.
- `<dl>`: A description list.
- `<dt>`: A term in a description list.
- `<fieldset>`: A set of related form controls.
- `<figcaption>`: A caption for a `<figure>` element.
- `<figure>`: Self-contained content, like illustrations, diagrams, photos, code listings, etc.
- `<footer>`: A footer for a section or page.
- `<form>`: A form for user input.
- `<h1>`, `<h2>`, `<h3>`, `<h4>`, `<h5>`, `<h6>`: Headings, level 1 through 6.
- `<header>`: Introductory content or navigational links.
- `<hgroup>`: A group of heading elements.
- `<hr>`: A thematic break between paragraph-level elements.
- `<li>`: A list item.
- `<main>`: The main content of the body of a document or application.
- `<nav>`: A section with navigation links.
- `<noscript>`: Content to be inserted if a script type on the page is unsupported or if scripting is currently turned off in the browser.
- `<ol>`: An ordered list.
- `<output>`: The result of a calculation.
- `<p>`: A paragraph.
- `<pre>`: Preformatted text.
- `<section>`: A section in a document.
- `<table>`: A table.
- `<tfoot>`: A group of footer rows in a table.
- `<ul>`: An unordered list.
- `<video>`: A video player.

## Inline Elements

Inline elements do not start on a new line and only take up as much width as necessary. Common inline elements include the following:

- <a>: A hyperlink.
- <abbr>: An abbreviation or acronym.
- <b>: Bold text.
- <bdi>: Text direction isolation.
- <bdo>: Overrides text direction.
- <br>: A line break.
- <cite>: A reference to a creative work.
- <code>: A piece of computer code.
- <data>: Adds a machine-readable translation of a given content.
- <dfn>: A definition term.
- <em>: Emphasized text.
- <i>: Text in an alternate voice or mood.
- <img>: An image.
- <input>: An input field.
- <kbd>: User input.
- <label>: A label for an <input> element.
- <mark>: Highlighted text.
- <q>: A short inline quotation.
- <s>: Text that is no longer correct.
- <samp>: Output from a program or computing system.
- <small>: Smaller text.
- <span>: A generic inline container.
- <strong>: Important text.
- <sub>: Subscript text.
- <sup>: Superscript text.
- <time>: A specific period in time.
- <u>: Unarticulated annotated text.
- <var>: A variable.
